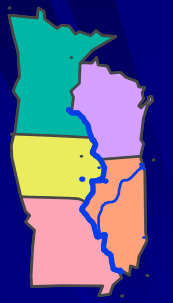
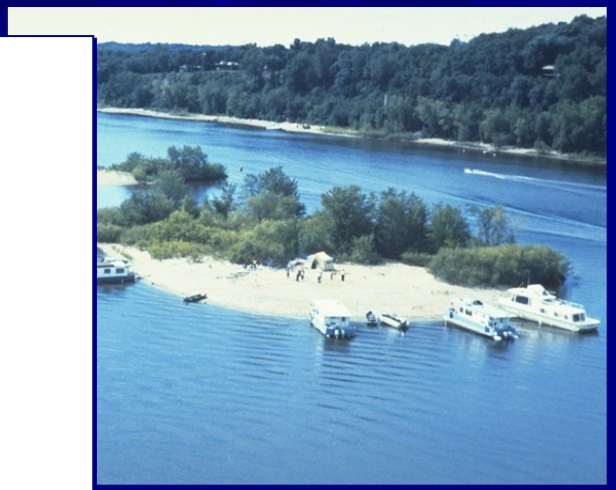
The EMP is…

One Team: Relevant, Ready, Responsive and Reliable

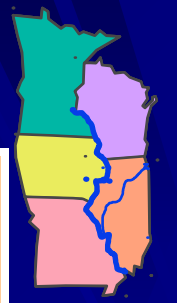
Upper Mississippi River System

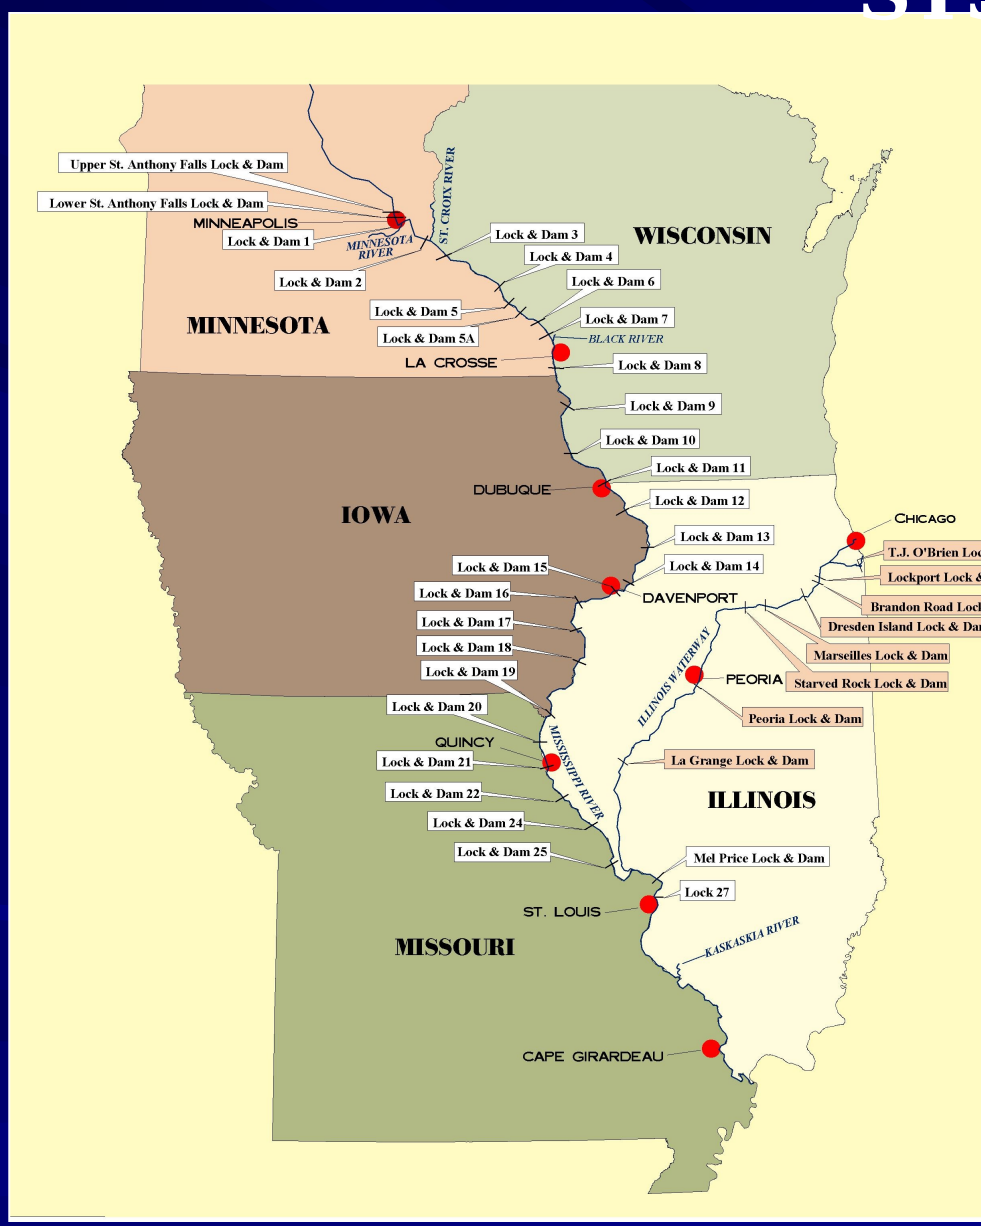




One Team: Relevant, Ready, Responsive and Reliable

UMR-IWW NAVIGATION SYSTEM

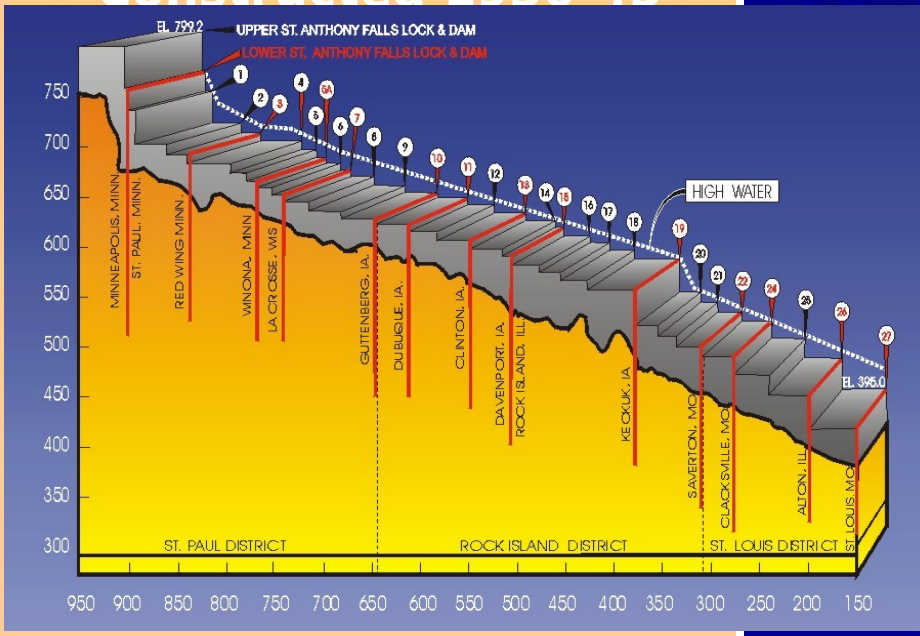




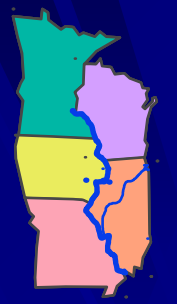
- **Significant Ecosystem**

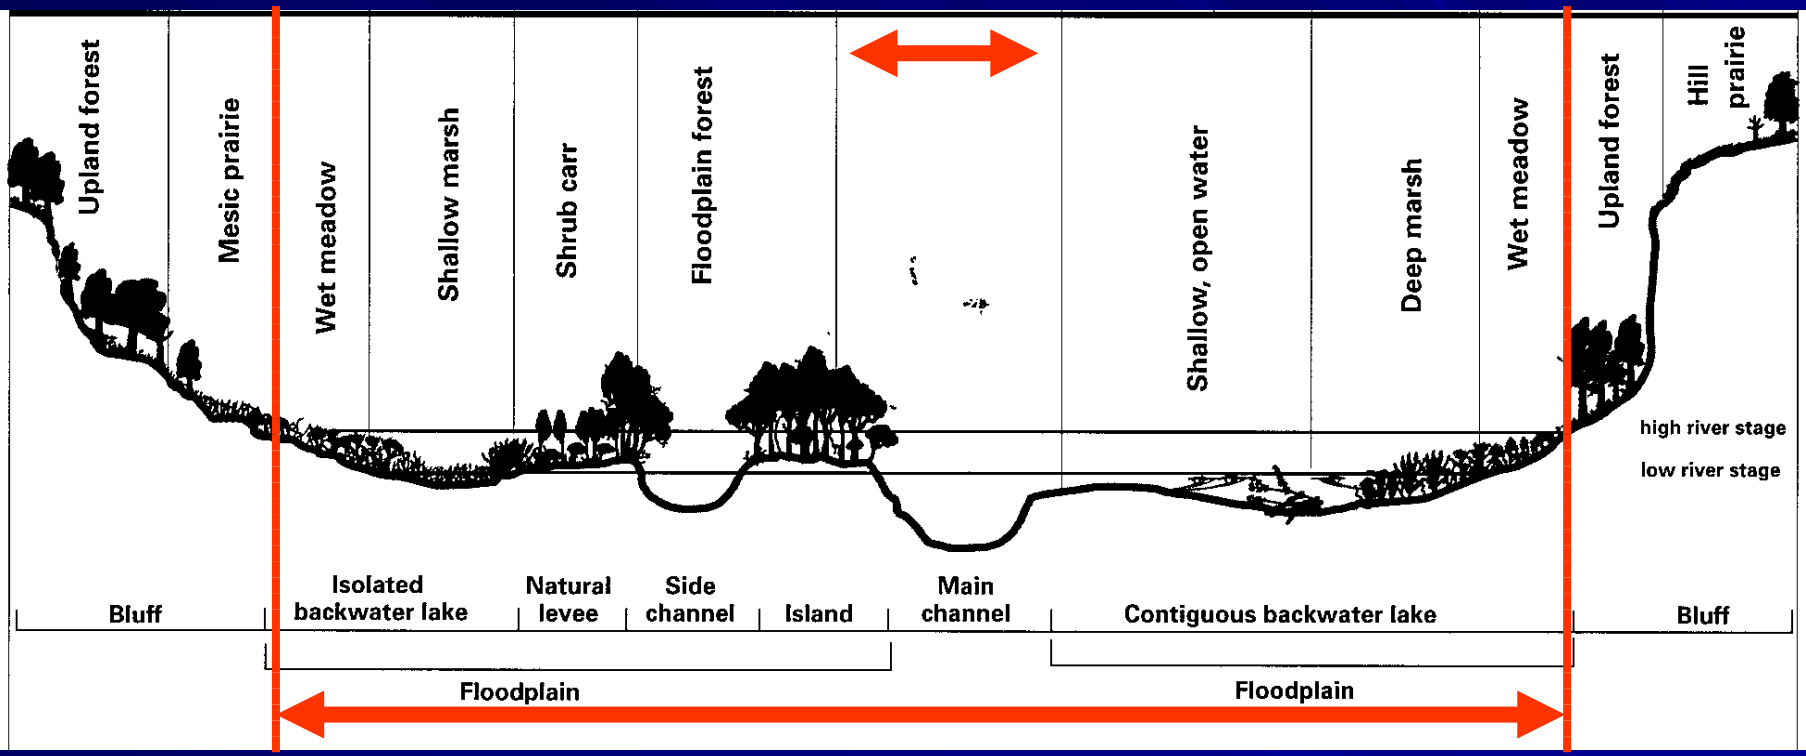
  (2.7 million acres)

- **30 Million People**
- **1,200 Miles of River**
- **37 Lock Sites Constructed 1930-45**



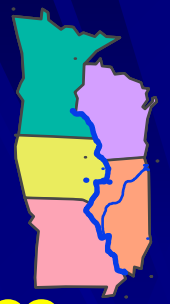
BOUNDARIES





ECOSYSTEM STUDY AREA (2.7 million acres)

National Significance of Upper Mississippi River System



Only River in the United States to be formally recognized by Congress "… as a nationally significant ecosystem and a nationally significant commercial navigation system. … shall be administered and regulated in recognition of its several purposes."

Citation: Water Resources Development Act of 1986, Section 1103(a)(2).

Nationally Significant Ecosystem

- Over 226,000 acres of National Fish and Wildlife Refuge land.
- 260 (25%) species of N. America's fish
- Provides food and habitat for hundreds of species of birds, mammals, amphibians, reptiles, plants, macro-invertebrates and fish.
- $2 billion in recreational activity

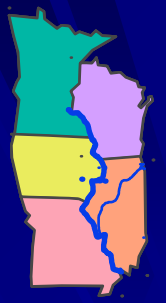
Monitoring & Analysis

LTRMP



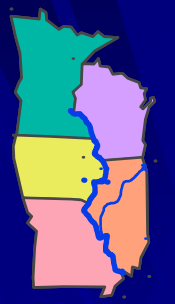
ACTION

Habitat Protection & Restoration

HREP

One Team: Relevant, Ready, Responsive and Reliable

Monitoring GOALS



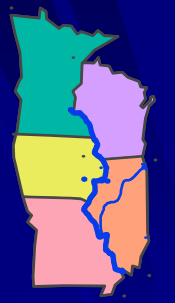
A better understanding of the ecology and its resource problems.

Tracking resource changes.

Develop alternatives to better manage the river.

Provide for the proper management of monitoring information.

Habitat Rehabilitation and Enhancement Projects



- Increase habitat diversity for wildlife and fish
- Provide off-channel resting and spawning habitat for fish
- Provide reliable floodplain wetlands and associated food resources
- Create shelter zones and nesting sites for birds
- Increase quality and amount of bottomland hardwoods

LOCK & DAM SITES

HREP SUMMARY 1988 - 2008

50 projects nearly complete or completed

83,000 acres of habitat

6 projects under construction

11,500+ acres of habitat

20 projects in design

43,000+ acres of habitat

74 Projects Total Acres:

135,000+

Per project range of investment: $56,000 - $13 million+ (majority of projects completed to date: $1-4 million range)

Island Protection and Restoration

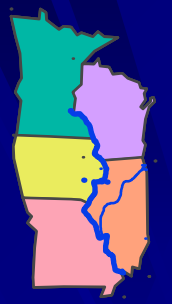
October 1961 August 1994 August 2000

One Team: Relevant, Ready, Responsive and Reliable

Success Is Based Upon:



- Common Purpose
- Building Trust and Respect
- Diversity of Ideas
- Diversity of Expertise
- “Contributed” Manpower

(Example following)

Winter Habitat Used by Bluegill and Crappie in the Upper Mississippi River and Evaluation of an EMP Habitat Project (Pool 11 Islands)
